

TASK 1: FINDING THE CLOSEST, CHEAPEST RESTAURANT

(1) This is the main page when one logs onto the website. The different types of cuisines appear on this page and the user can click on which type of food they crave. The user clicks on Mexican

(3) The user has selected their work address from the previous page and are then presented with a list of restaurants sorted chronologically by their distance from the user's location. They also have some filtering options on the left to help narrow search.

(2) The user is redirected to this page where they choose their location from one of their previously saved locations or enter a new address - their current location.

(4) The user clicked Taco Bell to see detailed information about the restaurant. The address and hours are available on screen, and there are three tabs for the menu, other user reviews, as well as a map to indicate a route to this restaurant from their current location.

TASK 2: FILTER OUT UNDESIRABLE RESTAURANTS
